DETAILED ACTION

This office correspondence is response to the Terminal Disclaimer filed on May 05, 2009.

Claims 1 - 3, 7 - 14, 17 - 23, 26 - 33, 36 - 41, and 43 - 45 are pending.

Claims 4 - 6, 15, 16, 24, 25, 34, 35 and 42 are cancelled.

REASONS FOR ALLOWANCE

The following is the examiner's statement of reasons for allowance:

There is no teaching or suggestion in the prior art of the combination of claim limitations, among other things, as presented in claims 1 - 3, 7 - 14, 17 - 23, 26 - 33, 36 - 41, and 43 - 45, specifically that detecting one or more actions performed by the user on the received e-mails from the entity, the actions supporting that the entity is associated with the user and including at least one of moving at least one of the received e-mails from a first folder to a second folder or leaving at least one of the received e-mails open for a predetermined period of time, determining that the entity is associated with the user based on the detected actions and associating a score with each of the detected actions performed by the user on the received one or more e-mails from the entity, the score indicating a strength of the action in supporting an inference that the entity is associated with the user.

This is found in Applicant's specification on page 2 lines 3 - 15 and page 15 lines 3 - 12.

The closest prior art found by the Examiner is the previously cited Goldman et al., however, this reference does not teach or suggest a detecting one or more actions performed by the user on the received e-mails from the entity, the actions supporting that the entity is associated with the user and including at least one of moving at least one of the received e-mails from a first folder to a second folder or leaving at least one of the received e-mails open for a predetermined period of time, determining that the entity is associated with the user based on the detected actions and associating a score with each of the detected actions performed by the user on the received one or more e-mails from the entity, the score indicating a strength of the action in supporting an inference that the entity is associated with the user.
